FINANCE
WHITEPAPER

COMPLIANCE

The following white paper is intended to be a technical overview. It is not intended to be comprehensive nor to be the final design. Noncritical aspects are not covered. This paper consists of information given for discussion purposes only and does not represent investment advice of any kind. Further, it does not constitute an offer to sell shares or securities, nor does it constitute a solicitation to buy such shares or securities. None of the information found within is intended to influence any investment decision nor should it be the basis of an investment decision of any kind. Investment advice for investment in any security, or any tax, or legal advice should only be given by an investment advisor, and we are not an investment advisor. We encourage readers to seek appropriate and independent professional advice to inform themselves of the legal requirements and tax consequences of any investments they make, both within Onlyone Finance and within the blockchain industry. Investments should only be done with the help of an independent financial advisor within context of the countries of their citizenship or residence, and their place of business with respect to the acquisition, holding or trade in Onlyone Finance (ONLYONE) or any other tokens. Please note that this White Paper does not constitute an offer to sell, or the solicitation of an offer to buy, for any person for whom it may be unlawful to participate in a token sale. Those for whom it is unlawful to participate should not participate. Consult with your own lawyer or accountant to determine whether it is lawful for you to participate in this token sale. This White Paper should in no way be construed as being intended to create a contract for investment. This White Paper (version 1.0) may be revised, with the newest edition always appearing on our website. For each revision cycle, we will provide notes on what has changed and the justification for the change. Updated versions of the White Paper (as indicated by consecutive edition numbers) may contain information which may override, clarify, or contradict previous editions, in which case the latest version should be considered the most accurate and up to date. Because of this, versions which are found outside of the Onlyone Finance website may contain out-of-date or inaccurate information. The most up-to-date version of the white paper can be located online at onlyonefinance.com.

DISCLAIMER

Purchasing ONLYONE is subject to many potential risks, some of which are described in this paper, and some of which are provided on onlyonefinance.com. These documents, along with additional information about our business and Onlyone Finance, are available on our website onlyonefinance.com.

Purchasers of ONLYONE could lose all or some of the value of the funds used to purchase ONLYONE.

ABSTRACT

The world of gambling has changed dramatically. Casinos and participants alike have rapidly embraced the advancements, adopting new platforms and technologies at an intense pace. Some online gambling platforms even accept cryptocurrency as legal tender to play.

This whitepaper introduces Onlyone Finance and their plans for the future development of Onlyone Casino, which is slated for completion in 2022. We invite the crypto community to participate in the project by purchasing the ONLYONE token from the pancakeswap.finance decentralized exchange. The actual online Onlyone Casino will include a variety of games and will have a reward system that will benefit the holders of the ONLYONE token.

INTRODUCTION

Dating all the way back to the Roman Empire, Gambling has historic and deep roots. Poker, blackjack, roulette, and other common casino games have modernized the industry and propelled massive growth. However, nothing beats the popularity and success of online gambling.

ONLINE GAMBLING HISTORY

Online gambling first appeared in 1994. In that year, Microgaming began developing software that provided the platform that InterCasino, the world's first online casino, operated on.¹ The gambling world has never been the same since. Over 200 online casinos emerged within two years and in the early 2000's the first mobile gambling site was born.

GAMBLING STATISTICS

In 2021, 76% of all online gambling revenue was expected to come from mobile gambling alone. The astonishing rise of mobile gambling is moving fast, with a 14% forecast period² through 2026. Innovation is pushing the market to new heights. According to the European Business review, the online gambling market was worth \$66.67 billion in 2020 “and is anticipated to be worth more than 92.9 billion dollars by the year 2023.”³

² [Global Mobile Gaming Market Growth, Trends and Forecasts 2020-2025: Free-to-play Pricing Model Offers Potential Growth - ResearchAndMarkets.com | Business Wire](https://www.researchandmarkets.com)

³ [Why Online Gambling Could Be The Next Big Investment Opportunity - The European Business Review](https://www.ebr.com)

According to a new report by Grand View Research, Inc., the global online gambling market size is expected to reach USD 127.3 billion by 2027, registering a CAGR of 11.5% from 2020 to 2027.⁴

With the growing popularity and adoption of cryptocurrencies, many online casinos now allow users to place bets using cryptocurrencies in addition to fiat. The potential for blockchain technology to completely overhaul the online gambling industry is apparent. Combining the growth of online gambling with the exploding popularity of crypto and DeFi has the potential for explosive gains.

THE PROBLEM

Popular online gambling sites like Las Atlantis and Super Slots casino currently accept cryptocurrencies. Still, these are highly centralized organizations that are designed to serve the house. Users are merely gamblers and nothing more. These sites incorporate cryptocurrencies but entirely miss the point and opportunity that arises with a blockchain based casino.

An entirely blockchain based gambling site would allow the community to not only be the house, by purchasing platform related tokens, but also provide security and an immutable ledger. No user needs to trust the house, when blockchain is in charge.

ONLYONE FINANCE

Onlyone Finance is a BEP-20 protocol utility token for the Onlyone Casino. Our team is currently developing the casino, an open-source casino where users will be able to bet ONLYONE, BUSD and BNB tokens.

On June 5th, 2021, the ONLYONE token was [launched](#) on the Binance Smart Chain. Initially 50% of the total token supply was [burned](#). The other 50% of the token supply was [sent to the Pancake Swap liquidity pool](#). Then we took another drastic step and [burned the liquidity pool \(LP\) tokens](#) to guarantee liquidity forever.

Onlyone Finance is the first of its kind in the trending crypto universe. The platform will incorporate the crypto community allowing them to participate in Casino Action like never before. Investors, now acting as the house, will not only be able to gamble using cryptocurrencies, but will receive a percentage of the House winnings. The House Advantage now belongs to the community.

⁴ [Online Gambling Market Size Worth \\$127.3 Billion By 2027 \(grandviewresearch.com\)](https://www.grandviewresearch.com/industry-analysis/online-gambling-market)

ONLYONE CASINO AND MOBILE APP

To serve the needs of our users and capitalize on the intense growth found in the online gambling industry, we will develop a mobile app and desktop platform for the Onlyone Casino. Since users will not want to pay transaction fees each time, they interact with the casino, users will have the option of creating a casino account. A simple log in will be incorporated using a BEP-20 wallet and a web3 interface, like Trust Wallet or Metamask. Users can then deposit their tokens into their casino accounts. This allows all players to play with their casino balance rather than paying transaction fees to the network for each game.

Sometime in fall of 2021, we expect to have blackjack, the first game prototype, completed and ready for testing. Following the successful implementation of blackjack, we will roll out a variety of casino games in succession to provide plenty of action for the users. The casino games' source code will be published on github. This allows players to calculate the house edge themselves, rather than blindly trusting casino owners. By 2022 we aim to have a selection of casino games available on the Onlyone Casino platform as well as the ONLYONE holders rewards system in place so holders can be the house. At any time, users will be able to withdraw funds from their casino account back into their wallet.

MARKETING

Once we begin to market Onlyone Finance, we will be working with the community, and various social media outlets to gain traction and visibility. While we experienced rapid growth after listing online, this was entirely due to organic interest in the project without any marketing effort.

“The Onlyone Casino Has a Blockchain Boost”

Leveraging blockchain technology provides a marketing tool that typical online casinos just don't have. Fair proof smart contracts, fair launch, token burns, and the ability to be the house as a token holder means the Onlyone Casino has a blockchain boost that will take us beyond the current limitations of typical online casinos.

We gladly welcome the crypto community into the new world of blockchain betting. Once our marketing efforts begin, we anticipate a long and fruitful Honeymoon Period for ONLYONE token holders.

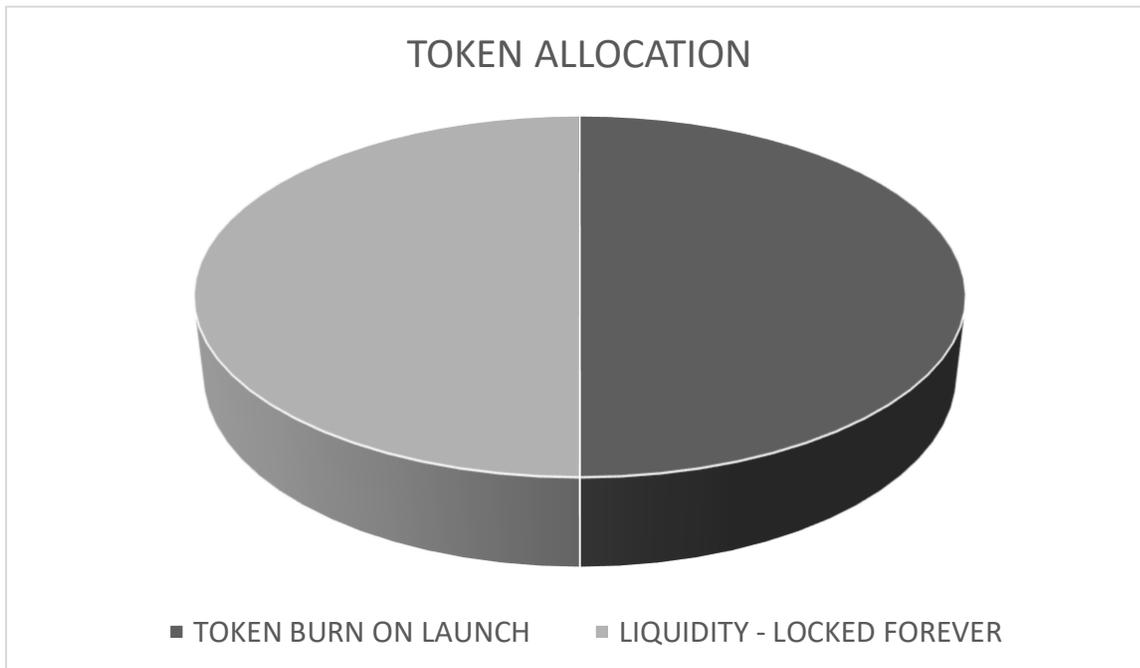

TOKENOMICS

Token Symbol: ONLYONE

Total Supply: 1

Liquidity: 50% (Liquidity Keys Burned)

Burn on Launch: 50%

TRANSACTION FEE

Pre-Casino Launch: 10% (Liquidity)

Post Casino Launch: 0%

BLOCKCHAIN TECHNOLOGY

ONLYONE token taps into the user base of the second largest decentralised blockchain platform for smart contracts after the Ethereum Network - the Binance Smart Chain (BSC). BSC offers excellent performance, with a network capable of producing a block every three seconds.

PancakeSwap is a decentralized application (dApp) on the BSC offering a variety of financial functions. PancakeSwap allows investors to easily purchase or sell ONLYONE Tokens from any mobile device or desktop computer.

HOLD AND BE THE HOUSE - STAKING

The Onlyone Casino is set to launch in 2022. This allows us enough time to generate enough investors and liquidity to provide a world class crypto online gambling platform. Unlike other online gambling platforms, ONLYONE holders get to act like the House. When ONLYONE holders stake their tokens in their casino account, a percentage of the gambling winnings of the casino will be redistributed directly to their account. In addition, a jackpot system will be developed in which holders of a certain amount of ONLYONE will have a chance to win bigger rewards. When ONLYONE investors go all in, their risk is akin to that of the Casino Owner, not the gambler.

TRANSACTION FEE DISTRIBUTION

Prior to July 6, 2021, 5% of the value of each token transaction was redistributed to holders and 5% of the value of each transaction was added back to the liquidity pool.

At present, 0% is redistributed to holders and 10% is added to the liquidity to stimulate new investments. Now every investor will have the same benefits.

Also, after the casino is ready, we will remove all the transaction fees and the users will buy and sell at the real market price. This way users will be able to buy, sell, and transfer ONLYONE tokens without any penalty.

ONLYONE FINANCE ROADMAP

Q3 2021

ONLYONE Token Fair Launch

ONLYONE Token 50% Burn

ONLYONE Token 50% Sent to Liquidity Pool

Liquidity Pool Tokens Burned

Onlyonefinance.com Goes Live

Onlyone Whitepaper Released

Q4 2021

Initial Casino Game Prototype – Blackjack
completed for the Onlyone Casino

2022

Develop Additional Casino Game Prototypes

Develop Onlyone Casino Reward Protocol
